

## REMARKS

By this Preliminary Amendment, the applicant/inventor requests that the specification be amended to claim the benefit of the prior related application.

This amendment is being submitted in response to a 30 January 2009 Decision on Petition, by Petitions Examiner Ms. Shirley Brinkley, in which the previous preliminary amendment, filed 21 October 2008, was rejected for including an incorporation by reference of the related application. It is understood that as the 21 October amendment was not acceptable, it was not entered and therefore the amendment herein is framed as an amendment to the specification as originally filed.

In the Amendment, changes are indicated by underlining for added matter.

Respectfully submitted,

By:

Robert H. Barrigar
